# *LAB No. 01*

## *Introduction and Installation of Computer Hardware & Software*

## *And*

## *Basics of MS Word (Software Application)*

Objectives:

1. ***Introduction to ICT***
2. ***Installation of computer hardware.***
3. ***Installation of software.***
4. ***To get familiar about the MS- Word application of MS- Office.***

### ***Introduction to ICT:***

- Use of computers

  – Solve problems

  – Perform calculations

- The computer systems consist of two major elements: hardware and software. Computer hardware is the collection of all the parts you can physically touch. Computer software, on the other hand, is not something you can touch. Software is a set of instructions for a computer to perform specific operations. You need both hardware and software for computer systems to work.
- ***ICT Definition:*** ICT, or information and communications technology (or technologies), is the infrastructure and components that enable modern computing.
- Although there is no single, universal definition of ICT, the term is generally accepted to mean all devices, networking components, applications and systems that combined allow people and

NAME OF STUDENT: Muhammad Rutaab Ali

organizations (i.e.,businesses, nonprofit agencies, governments and criminal enterprises) to interact in the digital world.

- ***Computer hardware and it's installation:***

Some hardware components are easy to recognize, such as the computer case, keyboard, and monitor. However, there are many different types of hardware components.

***Installing Computer Hardware:*** Installing computer hardware may seem to be a difficult task but once you know what to do it will be very easy process.

Turn Off the computer and unplug all wires connected to the tower and if there is a power switch on the back switch it off.

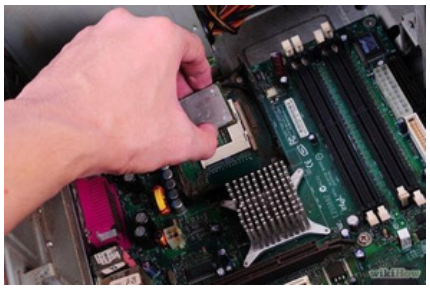

Firmly insert RAM (Random Access Memory) sticks into the long and narrow slots usually located at the top right of the motherboard.

Carefully place the CPU into the socket that is square shaped on the motherboard then place the CPU fan on top.

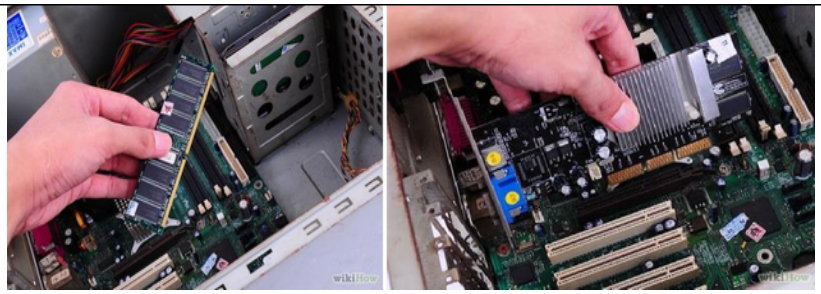

For video cards, look for a slot about the length of your middle finger and has very small lever. Take out the small case panel about the size of your finger on the back and firmly insert the card into the slot, make sure the back of the card comes outside.

For sound/network cards look for a slot similar to the video card slot, but slightly shorter and without the lever.

Slowly slide the hard drive into the hard drive bay usually located at the front of the tower then connected the cables from the back of the hard drive to the motherboard

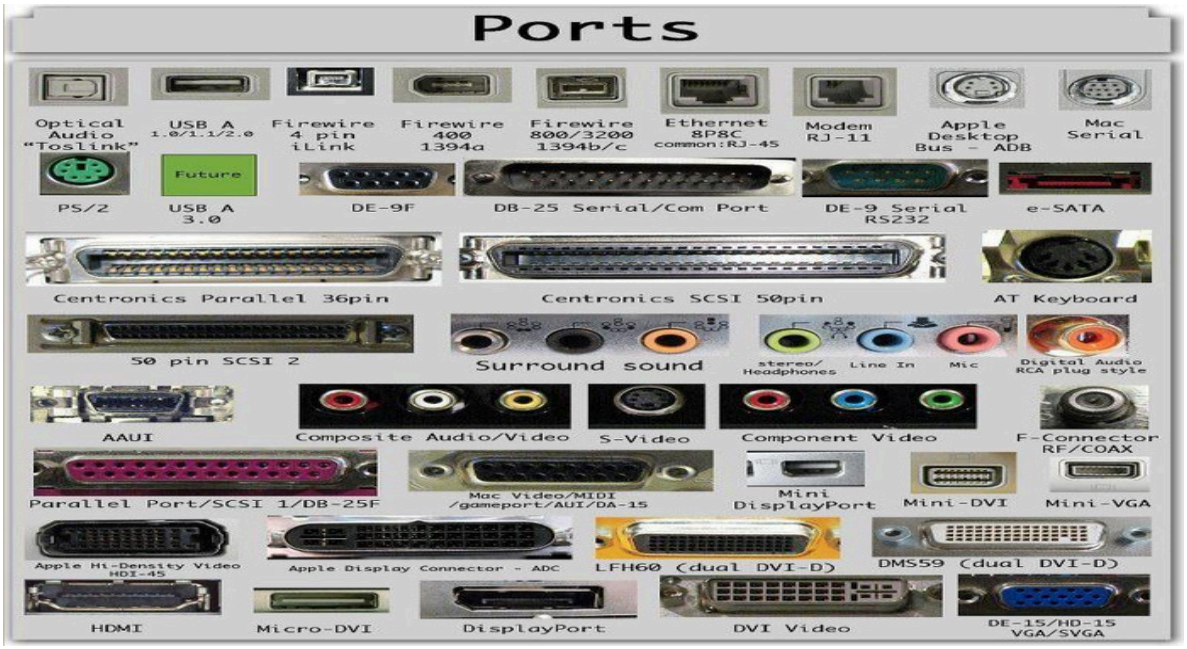

NAME OF STUDENT: Muhammad Rutaab Ali

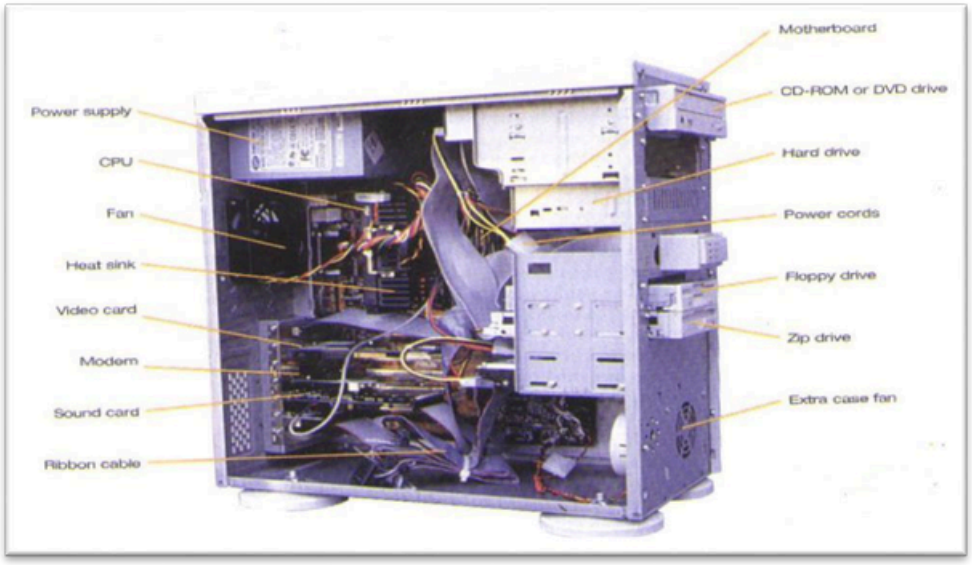

Identifying different parts of ports:

Recognize the internal Parts of CPU

NAME OF STUDENT: Muhammad Rutaab Ali

- ***Computer software and it's installation:***

- Software is a set of instructions for a computer to perform specific operations.

***Installation:***

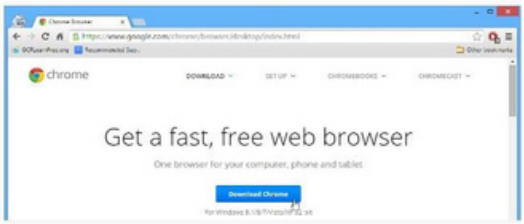

Today, the most common way to get new software is to download it from the Internet.

- Applications like Microsoft Office and Adobe Photoshop can now be purchased and downloaded right to your computer. You can also install free software this way. For example, if you wanted to install the Google Chrome web browser, you can visit that particular page and click the Download button.
- The installation file will be saved to your computer in .exe format. Pronounced dot e-x-e, this is the standard extension for installation files on Windows computers. You can follow the steps below to install an application from an .exe file.

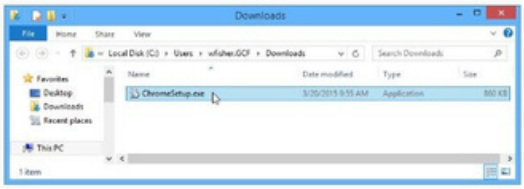

Steps:

NAME OF STUDENT: Muhammad Rutaab Ali

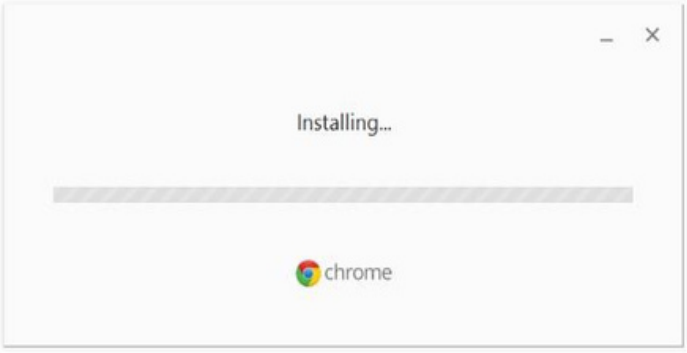

1. Locate and download an **.exe** file.

2. Locate and **double-click** the .exe file. (It will usually be in your **Downloads** folder.)

3. A dialog box will appear. Follow the instructions to install the software.

NAME OF STUDENT: Muhammad Rutaab Ali

4 The software will be installed. You can now open the application from the **Start menu** (Windows 7) or the **Start Screen** (Windows 8).

NAME OF STUDENT: Muhammad Rutaab Ali

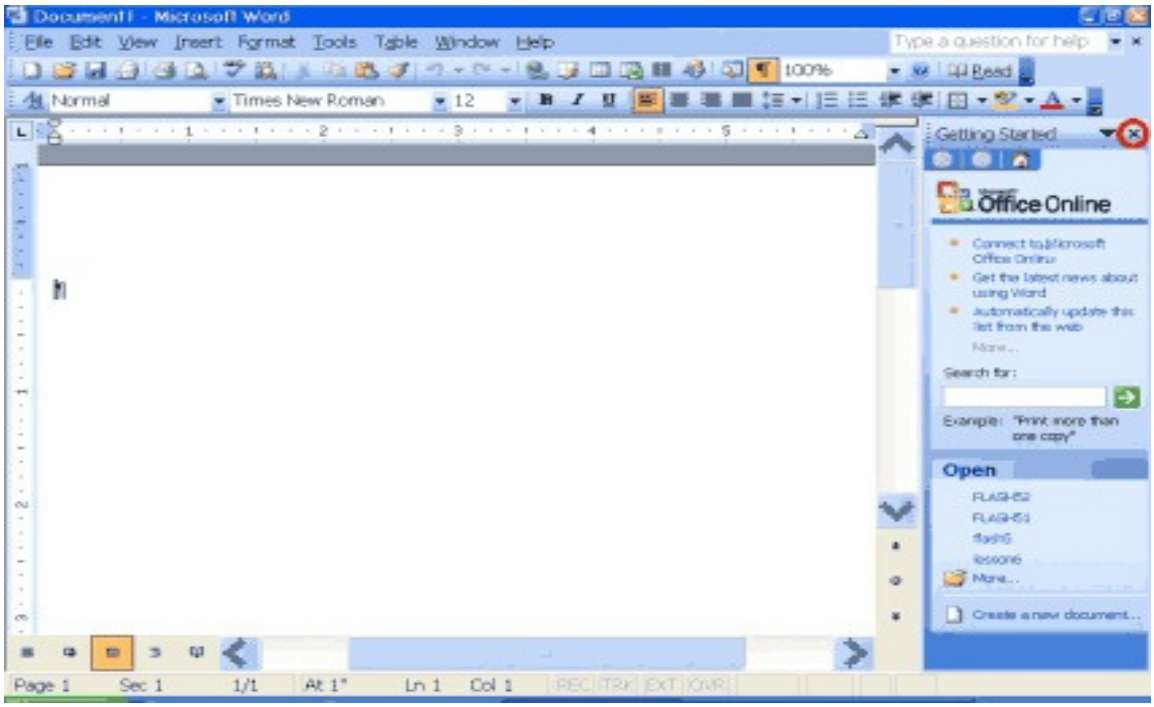

## ***MS Word:***

MS Word is a graphical ***word*** processing program that users can type. It is made by the computer company ***Microsoft***. Its purpose is to allow users to type and save documents. Similar to other ***word*** processors, it has helpful tools to make documents.

It allows for the creation of both simple and sophisticated documents. The program is equipped with templates and wizards to help you create useful documents such as resumes, letters and fax cover sheets.

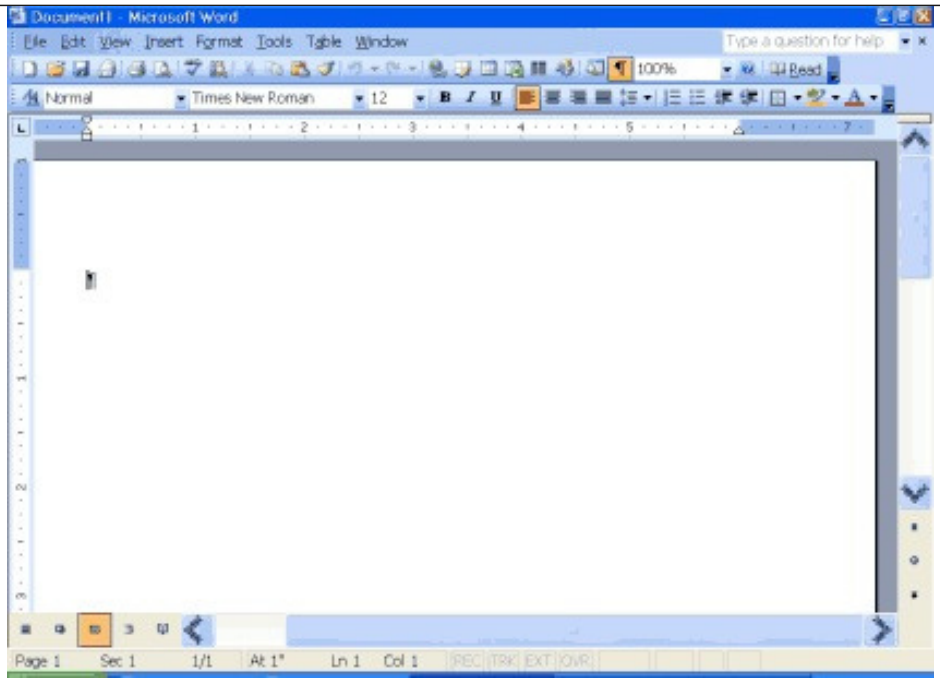

***Procedure***

To begin, open Microsoft Word. Your screen will look like the one shown here.

Click the X in the upper right corner of the New Document pane to close the New Document pane. Your screen will then look like the one shown here.

NAME OF STUDENT: Muhammad Rutaab Ali

***a) The Title Bar***

We will start with the Title bar, which is located at the very top of the screen. On the Title bar, Microsoft Word displays the name of the document on which you are currently working. At the top of your screen, you should see "Microsoft Word - Document1" or a similar name.

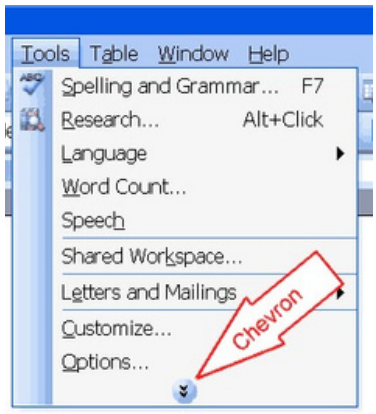

***b) The Menu Bar***

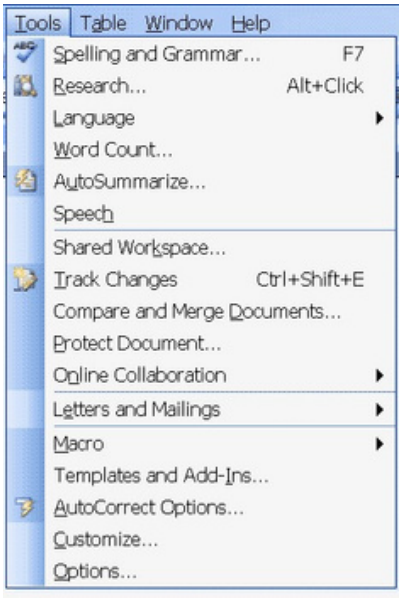

The Menu bar is generally found directly below the Title bar. The Menu bar displays the menu. The Menu bar begins with the word File and continues with Edit, View, Insert, Format, Tools, Table, Window, and Help. You use the menus to give instructions to the software. Point with your mouse to a menu option and click the left mouse button to open a drop-down menu. You can now use the left and right arrow keys on your keyboard to move

NAME OF STUDENT: Muhammad Rutaab Ali

leftand right across the Menu bar options. You can use the up and down arrow keys to move up and down the drop-down menu.

The most frequently used menu options appear on the menu list. A chevron appears at the bottom of the list. Click the chevron to display additional menu options.

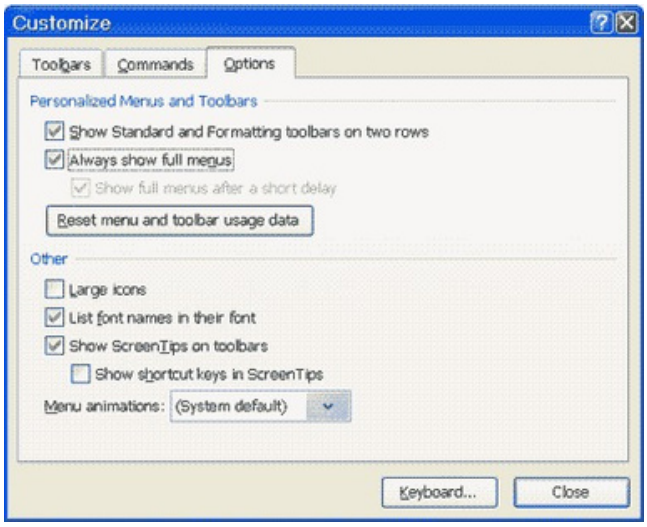

To select an option, click the option or use the arrow keys to move to the option on the drop-down menu and press Enter. An ellipse or a right arrow after a menu item signifies additional options; if you select that menu item, a dialog box appears. Items in gray are not available.

NAME OF STUDENT: Muhammad Rutaab Ali

You cancustomize your screen so that all of the menu options display when you click a menu item. This tutorial assumes that your menu is set to display all menu options. To customize your menu to display all of the menu options:

1. Click Tools on the Menu bar.
2. Click Customize on the drop down menu. The Customize dialog box opens.
3. Click the Options tab.
4. Click in the check box to select Always Show Full Menus.

5. Click Close.

***c) Toolbars***

The Standard Toolbar

The Formatting Toolbar

NAME OF STUDENT: Muhammad Rutaab Ali

Toolbars provideshortcuts to menu commands. Toolbars are generally located just below the Menu bar. Before proceeding with this lesson, make sure the toolbars you will use -- Standard and Formatting -- are available. Follow these steps:

1. Click View on the Menu bar.
2. Highlight Toolbars.
3. Standard and formatting should have check marks next to them. If both standard and formatting have heck marks next to them, presses Esc three times to close the menu.
4. If they do not both have check marks, click Customize.
5. Click the Toolbars tab.
6. Point to the box next to the unchecked option and click the left mouse button to make a check mark appear.

   Note: You turn the check mark on and off by clicking the left mouse button.
7. Click Close to close the dialog box.

***d) The Ruler***

The ruler is generally found below the main toolbars. The ruler is used to change the format of your document quickly. To display the ruler:

1. Click View on the Menu bar.
2. The option Ruler should have a check mark next to it. If it has a check mark next to it, press Esc to close the menu. If it does ***not*** have a check mark next to it, continue to the next step.
3. Click Ruler. The ruler now appears below the toolbars.

***e) Document View***

NAME OF STUDENT: Muhammad Rutaab Ali

InWord, youcan display your document in one of five views: Normal, Web Layout, Print Layout, Reading Layout, or Online Layout.

***1. Normal View***

Normal view is the most often used and shows formatting such as line spacing, font, point size, and italics. Word displays multiple-column text in one continuous column.

***2. Web Layout***

Web layout view enables you to view your document as it would appear in a browser such as Internet Explorer.

***3. Print Layout***

The Print Layout view shows the document as it will look when it is printed.

***4. Reading Layout***

Reading Layout view formats your screen to make reading your document more comfort-able.

***5. Outline view***

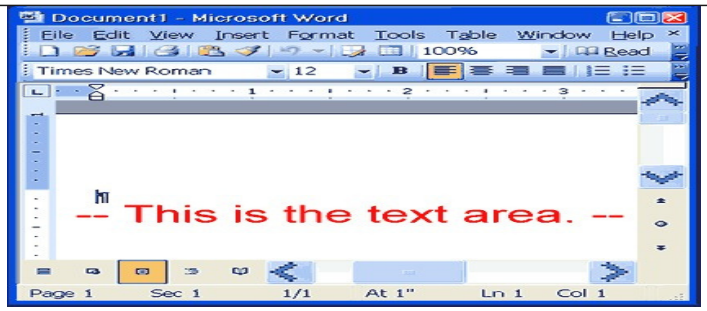

Outline view displays the document in outline form. Headings can be displayed without the text. If you move a heading, the accompanying text moves with it.

Before moving ahead, check to make sure you are in Normal view:

1. Click View on the Menu bar.
2. The icon next to Normal should have a box around it. If the icon next to normal has a box around it, press Esc to close the menu. If the icon next to Normal does not have a box around it, continue on to the next step.
3. Click Normal. You are now in Normal view.

***f) Text Area***

NAME OF STUDENT: Muhammad Rutaab Ali

Just below the ruler is a large area called the "text area" You type your document in the text area. The blinking vertical line in the upper left corner of the text area is the cursor. It marks the insertion point. As you type, your work shows at the cursor location. The hori- zontal line next to the cursor marks the end of the document.

### *g) Exiting Word*

You have completed Lesson One. Typically, you would save your work before exiting. This lesson does not require you to enter any text, so you might have nothing to save. To exit Word:

1. Click File.
2. Click Exit, which can be found at the bottom of the drop-down menu.
3. If you have entered text, you will be prompted: "Do you want to save changes to Document1?" To save your changes, click Yes. Otherwise, click No.
4. Specify the correct folder in the Save In box.
5. Name your file by typing ***lesson1.doc*** in the File Name field.
6. Click Save.

### *4. More feature of Microsoft word*

As in most Microsoft Office products, a number of keyboard shortcuts exist in Word that can save you time:

| | |
|---|---|
| CTRL+O | Open |

NAME OF STUDENT: Muhammad Rutaab Ali

| | |
|---|---|
| CTRL+Z | Undo |
| CTRL+Y | Redo. In some cases, if there is nothing to redo, this repeats the last action. |
| CTRL+S | Save |
| CTRL+P | Print |
| ALT+F4 | Close the active window |
| CTRL+B | Bold |
| CTRL+I | Italic |
| CTRL+U | Underline |
| CTRL+R | Align right |
| CTRL+E | Align center |
| CTRL+L | Align left |
| CTRL+C | Copy |
| CTRL+X | Cut |
| CTRL+V | Paste |
| CTRL+C+CTRL +C | Open the clipboard |
| CTRL+F | Find |
| CTRL+H | Replace |
| CTRL+A | Select whole document |

NAME OF STUDENT: Muhammad Rutaab Ali

| | |
|---|---|
| F7 | Spell checker |
| SHIFT+F7 | Thesaurus |
| CTRL+SHIFT+S | Style box |
| CTRL+SHIFT+F | Font |
| CTRL+SHIFT+N | Change font to Normal style |

Try several of these shortcuts now to familiarize yourself with these commands.

## Helpful Keyboard Navigation Hints

| Keystroke Shortcuts | Press SHIFT+ any of the following keystrokes to select text |
|---|---|
| Left one character at a time | LEFT ARROW |
| Right one character at a time | RIGHT ARROW |
| Down one line at a time | DOWN ARROW |
| Up one line at a time | UP ARROW |
| Left one word at a time | CTRL+ LEFT ARROW |
| Right one word at a time | CTRL+ RIGHT ARROW |
| To the beginning of the current line of text | HOME |
| To the end of the current line of text | END |
| To the beginning of the document | CTRL+HOME |
| To the end of the document | CTRL+END |

NAME OF STUDENT: Muhammad Rutaab Ali

| | |
|---|---|
| Upone full screen | PAGE UP |
| Down one full screen | PAGE DOWN |
| To the beginning of the previous page | CTRL+PAGE UP |
| To the beginning of the next page | CTRL+PAGE DOWN |

***5. Font***

A ***font*** is the combination of typeface and other qualities, such as size, pitch, and spacing. For example, Times Roman is a typeface that ***defines*** the shape of each character. Within Times Roman, however, there are many ***fonts*** to choose from -- different sizes, italic, bold, and so on.

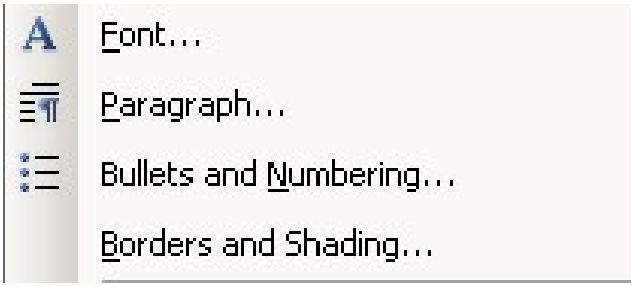

You can also apply Bold, Italics and Underlining to your text using the keys above on the menu bar which look like this. To do this -highlight the word or phrase you want in either Bold, Italics or Underline and then click one of the buttons above to get the desired effect. (NOTE: You can also use the Ctrl + B, Ctrl+I, or Ctrl+ U shortcuts.)

In order to change fonts in your document, you can click the icon on the tool bar: You can also change fonts by selecting text and going to Format Font.

The Normal and Arial Icon are types of styles you can create with your Word document. The second box, Arial

Narrow is a type of Font and the 11 is the size of the font selected. You can change the font size in by pushing down on the down-arrow button. (You can also go to ***Format Font*** and adjust it there

NAME OF STUDENT: Muhammad Rutaab Ali

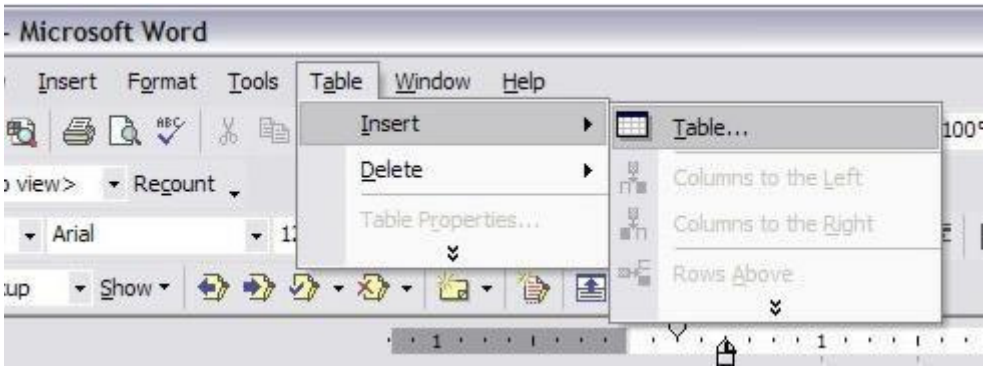

### *6. Table*

A table is a grid of rows and columns that intersect to form cells. The lines that mark the cell boundaries are called gridlines. It's often easier to read or present information in table format than in paragraph format. Using Word's table feature, you can create a table and insert text, pictures, or another table into the table's cells.

#### *Creating a Table*

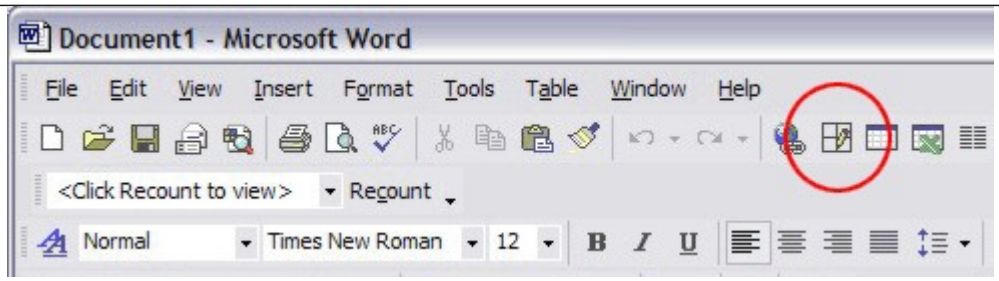

There are two ways to create a table:

1. Insert a table by using the Insert Table dialog box or the Insert Table button on the Standard Toolbar.

2. Draw a table by using the Tables and Borders Toolbar.

NAME OF STUDENT:

*Columns, Rows and Cells in a Table*

Column

| Day | Departure Time | Arrival Time | Flight Number |
|---|---|---|---|
| Mon-Fri | 7:20 a.m. | 8:20 a.m. | 664 |
| Sat | 9:00 a.m. | 10:05 a.m. | 808 |
| Mon-Sun | 9:25 a.m. | 10:30 a.m. | 822 |
| Mon-Sat | 10:50 a.m. | 11:55 a.m. | 968 |

Row

Cell

Muhammad Rutaab Ali

Note: You can apply formatting options to tables, such as borders and shading, or display a table with or without gridlines.

3. Keying and Editing Text in Tables

Keying and editing text in tables is similar to working with text in paragraphs. The Insert and Delete keys work the same way. But if you key text in a cell and press Enter, a new paragraph is created within the same cell. The first row of a table is often called the header row, in which each cell contains a heading for the column of text below it.

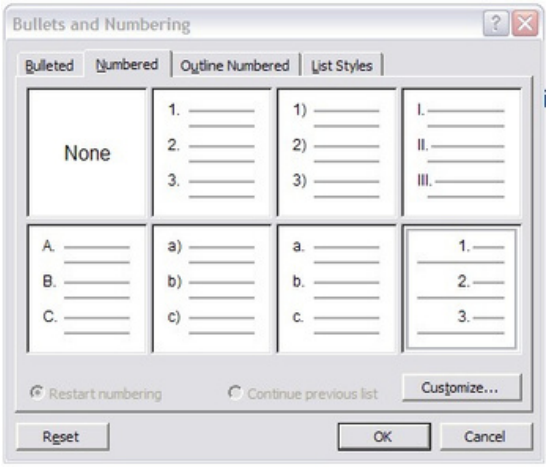

***Shortcuts for Moving Between Cells***

| ***To move to*** | ***Press*** |
|---|---|
| Next Cell | Tab |
| Previous Cell | Shift + Tab |
| First Cell in the Current Row | Alt + Home |
| Last Cell in the Current Row | Alt + End |
| Top Cell in the Current Column | Alt + PgUp |
| Last Cell in the Current Column | Alt + PgDn |

***7. Bullet and Numbering***

NAME OF STUDENT: Muhammad Rutaab Ali

Bullets and Numbering is a paragraph level attribute that applies a bullet character or a numeral to the start of the paragraph. Applying a bullet is straight forward; numbering is a bit more complicated

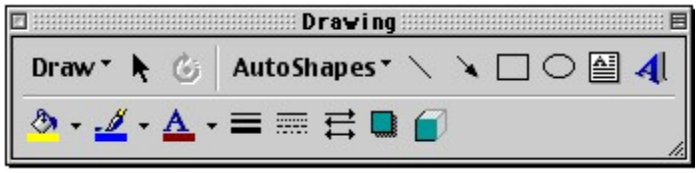

## 8. *The Drawing Toolbar*

The ***drawing toolbar*** was a feature in Microsoft Word that allowed users to ***draw*** and color shapes, add text effects and create text boxes within a Word document. Users could choose from pre-drawn shapes, add clip art or ***draw*** their own shapes.

This entire toolbar could become a floating window by double-clicking on the control bar at the far left end of this toolbar. That gives the following window, which can be placed anywhere on the screen:

This toolbar can be restored to its original position by clicking in the gray bar at the top and dragging it back to the top of the screen. Push the top of the window up to the bottom of the menu bar.

NAME OF STUDENT: Muhammad Rutaab Ali

## *Function of commonly used buttons*

| | | | |
|---|---|---|---|
|  | A pull down menu with several drawing options |  | Changes the pointer to a selection arrow |
|  | Rotates the selected object to any degree |  | A pull down menu with several libraries of shapes |
|  | Draws a line where you click and drag. Hold the Shift key down to make the line straight |  | Inserts a line with an arrowhead where you click and drag |
|  | Draws a rectangle where you click and drag. Hold down Shift to draw a square |  | Draws an oval where you click and drag. Hold down Shift to draw a circle |
|  | Draws a text box where you click and drag |  | Create text effects with Word Art |
|  | Add, modify, or remove fill color from a selected object |  | Add, modify, or remove line color |
|  | Formats the selected text with the color you click |  | Changes the thickness of lines |
|  | Selects dash style for dashed lines |  | Select arrow style; placement and shape of arrowhead |
|  | A pull down menu offers shadow choices |  | Add 3-d effects to rectangles or ovals |

NAME OF STUDENT: Muhammad Rutaab Ali

***Lab Tasks***

1) Install any software application etc. on your PC and write its installation steps as well as attach screenshot of each step.

***Solution:***

2) Create your own resume by using following tools:

Table (with shading),

Bullets,

Watermark

Header and footer

Shapes

Page border

Links and hyperlink

Bold, italic, underline font

Your Picture

***Solution:***

3) Draw any diagram on hospital management by the help of using drawing tool bar.

***Solution:***

4) Design invitation card (Party or wedding) by using tools in class.

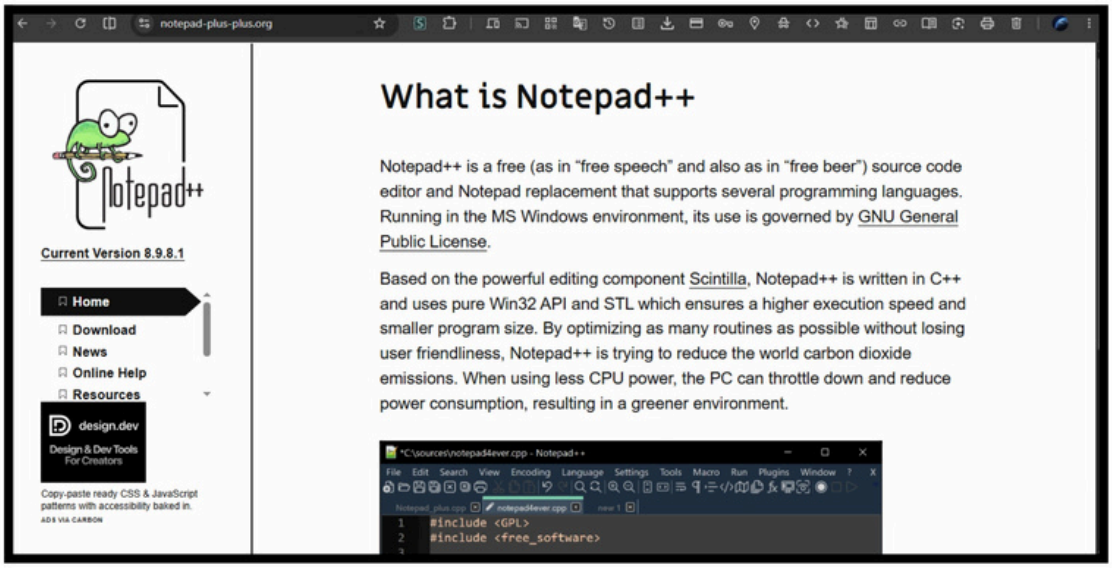

***Solution:***

5) Design an advertisement of any restaurant supposing yours.

***Solution:***

NAME OF STUDENT: Muhammad Rutaab Ali

**1) Install any software application etc. on your PC and write its installation steps as well as:**

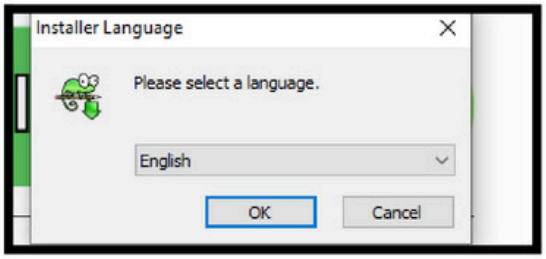

# Installation of Notepad++

**Step 1: Download the Setup File** Visit the official Notepad++ Downloads Page in a web browser and click the **Download** button to save the .exe installation file to the computer.

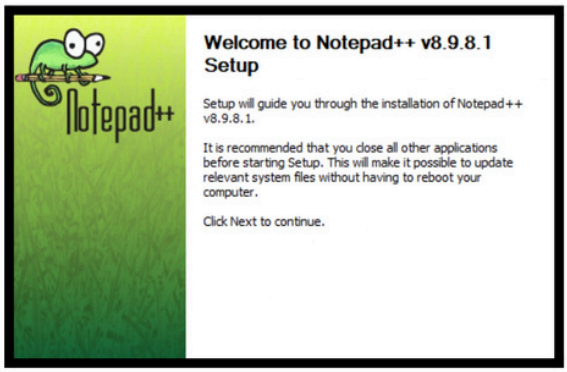

**Step 2: Locate and Run the .exe Installer** Open the **Downloads** folder on the computer and double-click the downloaded npp.Installer.exe file to start the installation process.

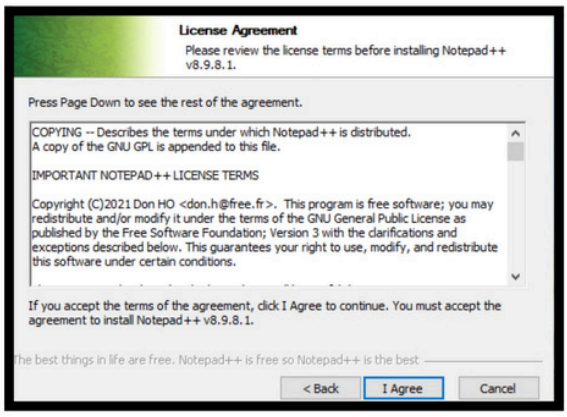

**Step 3: Select Installer Language** Select **English** in the Installer Language dialog box and click **OK**.

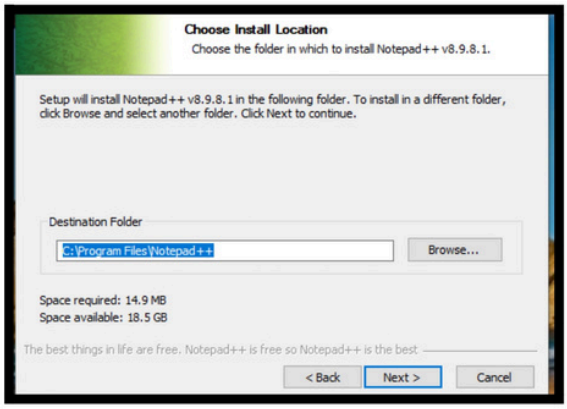

NAME OF STUDENT: Muhammad Rutaab Ali

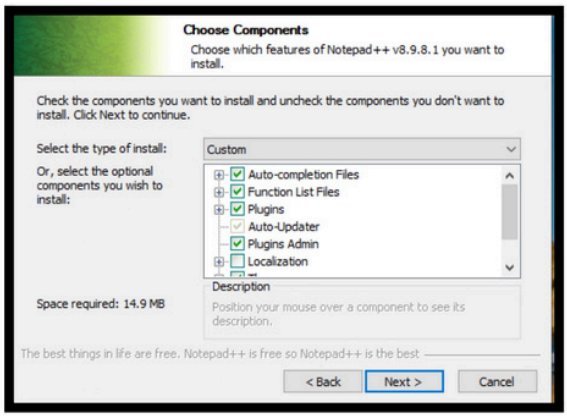

**Step 4: Welcome Screen** Click **Next** on the Notepad++ Setup Wizard screen.

**Step 5: Accept the License Agreement** Click **I Agree** on the License Agreement screen.

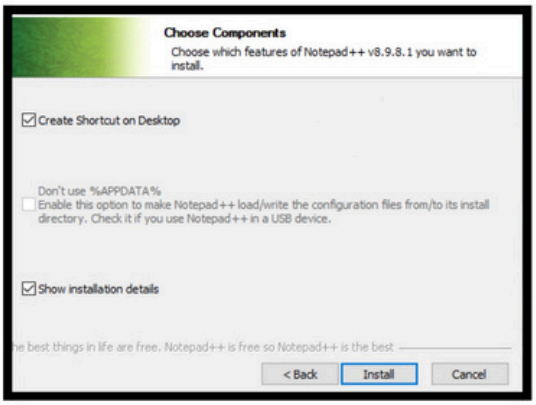

**Step 6: Choose Destination Folder** Keep the default folder (C:\Program Files\Notepad++) and click **Next**.

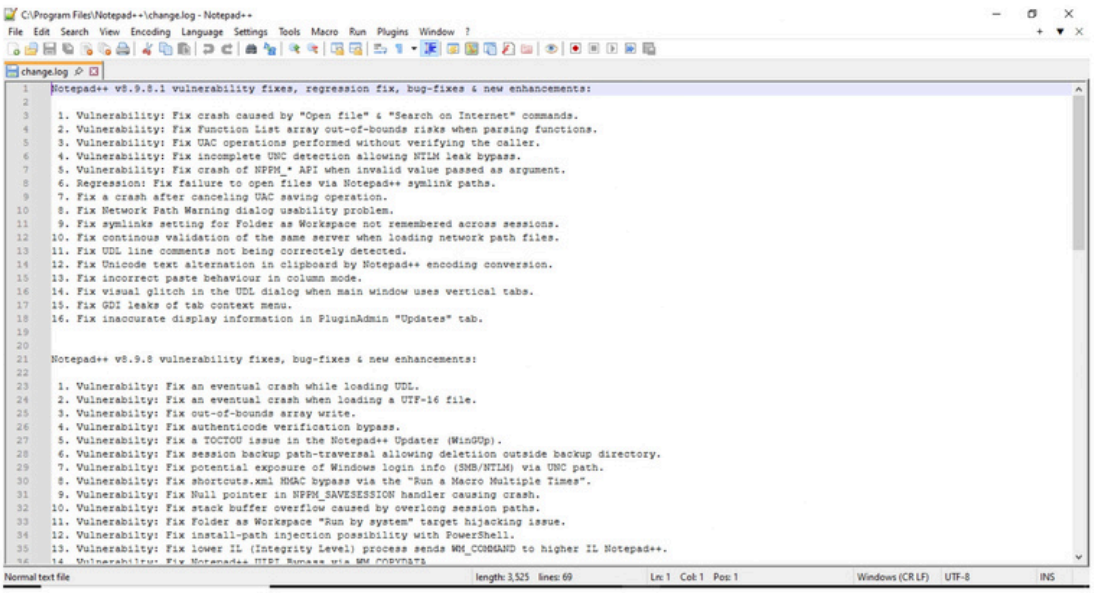

**Step 7: Select Components and Install** Keep the default components selected, click **Next**, and click **Install**.

NAME OF STUDENT: Muhammad Rutaab Ali

**Step 8: Complete Installation and Launch** Keep **Run Notepad++** checked and click **Finish** to open the application.

## Open Notepad++ To access

NAME OF STUDENT: Muhammad Rutaab Ali

## 2) Create your own resume by using required tools:

# Muhammad Rutaab Ali

**Web Developer & E-Commerce SEO Specialist**

**Location:** Nazimabad No. 3, Karachi, Pakistan **Phone:** +92 319 2342358
**Email:** rutaabali3@gmail.com

## PROFILE

I am **Muhammad Rutaab Ali**. I am currently studying at Aptech Learning for a **Diploma in Information Technology (IT)**.

## ACADEMIC QUALIFICATIONS

| Qualification / Degree | Institution | Year / Status | Duration / Result |
|---|---|---|---|
| **Diploma in Information Technology (IT)** | Aptech Learning, Karachi | *In Progress* | Duration: 3 Years |
| **Cloud Data Engineering** | SMIT, Bahadurabad | *In Progress* | Duration: 1 Year |
| **Intermediate (HSSC)** | Govt. National College, Karachi | *2024* | 557 / 1100 (50.64%) |
| **Matriculation (SSC)** | SM Public Academy, Karachi | *2022* | 966 / 1100 (87.82%) |

## PROFESSIONAL EXPERIENCE

- **Content Assistance** — *2025 – Present*
  Create promotional video & image assets and manage digital product libraries.
- **E-Commerce Management (Website)** — *2024 – Present*
  Manage store listings, optimizing descriptions, pricing & stock.
- **Search Engine Optimization (SEO)** — *2024 – Present*
  Apply targeted keyword & metadata SEO to boost organic search rankings.
- **E-Commerce Management (eBay)** — *2024 – Present*
  List and manage eBay store catalogs, updating inventory and pricing.
- **Social Media Sales & Support** — *2023 – 2024*
  Resolved inquiries on social & chat channels, converting leads into orders.

## TECHNICAL SKILLS & TOOLS

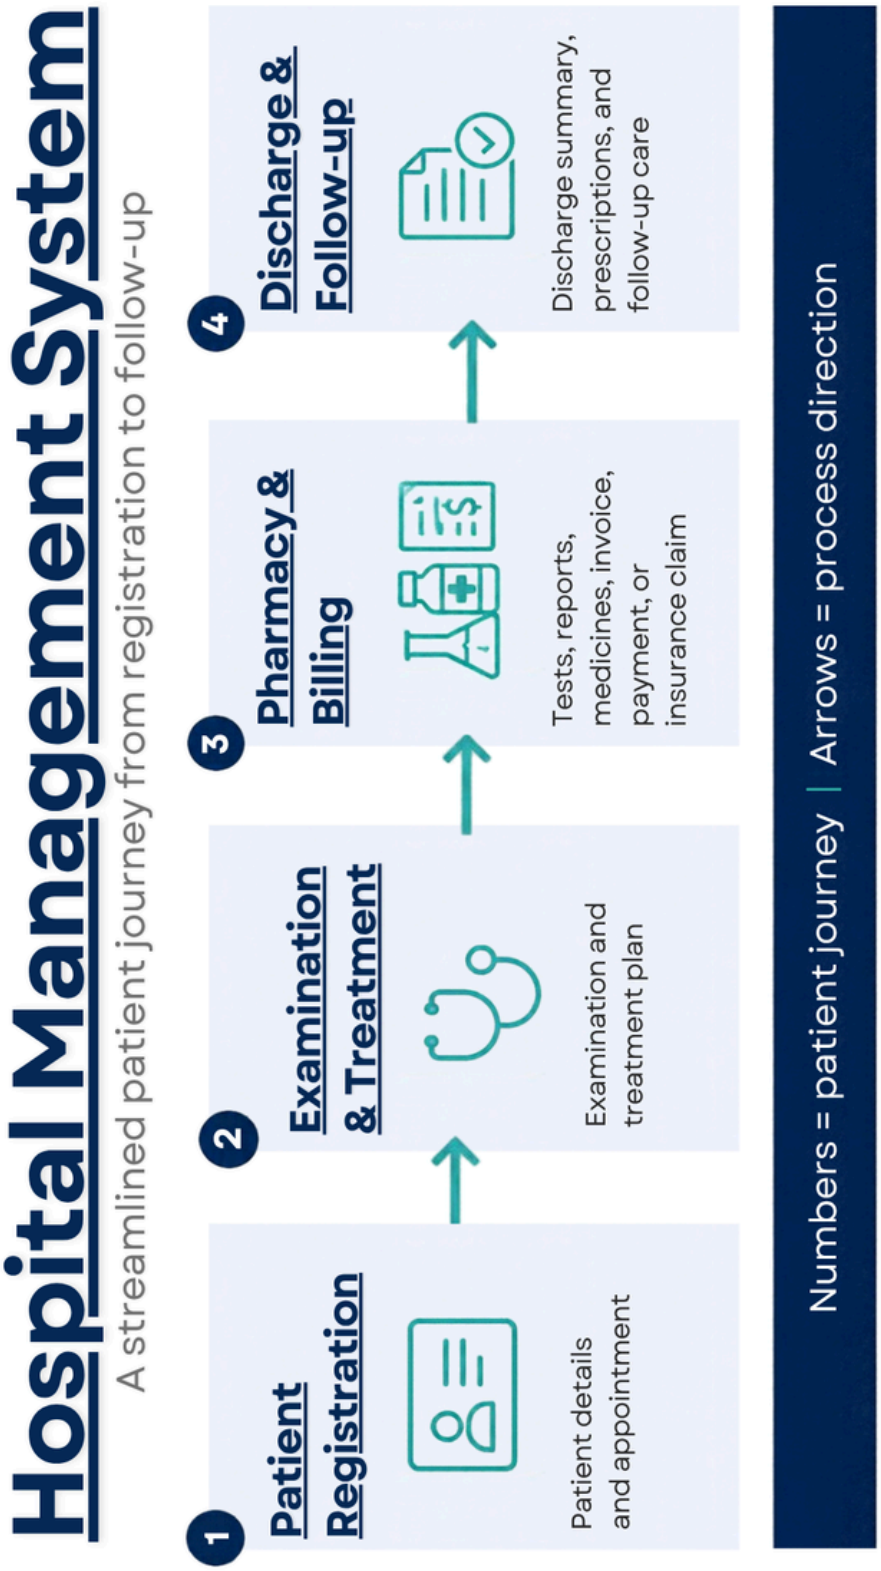

- **Web Development:** Frontend, PHP, Laravel, ASP.NET, MERN, MEAN, Tailwind CSS
- **Databases & Cloud:** MySQL, Git, GitHub, Vercel, Firebase
- **E-Commerce:** Search Engine Optimization (SEO), Product Listing Optimization, eBay Management
- **AI & Automation:** Prompt Engineering, OpenAI API, Anthropic Claude, AI Automation

## LANGUAGES

**Urdu** • **English**
